Introduction

NOLA ~ is a decentralized cryptocurrency built on the Polygon network, centered around building a strong technological foundation while encouraging a collaborative and knowledgeable community. The goal is to create a currency that supports real usage, smooth adoption, and integration into meaningful digital and economic environments.

NOLA emphasizes stability and sustainability through its carefully planned release schedule, ensuring balanced circulation and steady ecosystem development over time.

With its strategic roadmap and continuous development, *NOLA* aims to evolve into a reliable, future-focused digital asset that stands for clarity, resilience, and long-term value creation.

Key Specifications

Token : *NOLA*

Symbol: *NOL*

Decimals: 6

Blockchain: Polygon

Total Supply: 2 million *NOLA*

Creation Date: November 4th, 2025

Smart Contract Address: 0x1515546B052151D5eb8CCB1bcf2857E0C6f51451

NOLA is built on simplicity and transparency to guarantee fairness and accessibility for all participants. The project upholds several core principles

Sustainable Growth Framework: *NOLA* evolves in measured phases, prioritizing consistency, long-term adoption, and responsible ecosystem expansion.

No Pre-Mining or Hidden Allocations: The entire supply is distributed fairly from inception

No Airdrops or Artificial Giveaways: Every *NOLA* represents actual, circulating value

Structured Token Release Schedule: A controlled release prevents inflation while ensuring market stability

Low-Cost, High-Efficiency Transactions: Leveraging Polygon ensures minimal fees and high-speed transfers

- **Real-Use Utility Focus**: *NOLA* is designed for integration into practical, real-world environments—not just speculation or trading.

Together, these principles form the foundation of NOLA's long-term vision. By prioritizing sustainability, clarity, and real-world application, NOLA aims to create an ecosystem that grows steadily and confidently over time.

The Purpose of *NOLA*

NOLA is designed to facilitate efficient transactions, support decentralized applications, and provide a dependable medium of exchange within emerging digital economies. The focus is on practical utility, consistency, and long-term reliability.

Practical ex: With its limited supply and controlled release, *NOLA* is positioned for sustainable growth and everyday use

A Vision Beyond Finance

NOLA aims to contribute to the broader development of blockchain-based infrastructure, where digital assets can support commerce, collaboration, and secure data-driven systems.

NOLA seeks to strengthen interoperability, encourage responsible adoption, and integrate with real economic workflows rather than serve solely speculative interests.

High-Impact Goals

NOLA's strategic roadmap emphasizes measurable, sustainable development focused on integrating with platforms that benefit from low-cost, high-speed transactions, while enabling tools and frameworks that enhance accessibility and operational efficiency. At the same time *NOLA*'s evolving infrastructure is designed to support market stability and encourage consistent long-term network participation

ZeroCoin (ZRC)

Tokenomics & Distribution plan

Token Supply and Structure

NOLA was created with a fixed total supply of **2 million** *NOL*, ensuring scarcity and long-term value. The **6 decimal** precision allows for microtransactions while maintaining the coin's integrity

Total Supply: 2,000,000 *NOLA*

Decimals: 6

Token Release Schedule

To prevent price manipulation, *NOLA* follows a structured release schedule that balances availability and long-term sustainability

Phase 1: Initial Release

Timeframe: First 12 to 18 months

Percentage Released: 20% = 400,000 *NOL*

Purpose: Establish circulation and liquidity

Phase 2: Controlled Yearly Release

Annual Release: 10% = 200,000 *NOL*

Distribution: Released gradually throughout the year , See the distribution on the official website

Transaction Fees & Sustainability

No inflation: Fixed supply prevents devaluation over time
Polygon-based: Transactions are fast and cost-efficient
Average Transaction Fee: < $0.01

Technical Specifications

NOLA is built on the **Polygon (MATIC) blockchain**, taking advantage of its **low transaction fees, high speed, and security**

Consensus Mechanism: Proof of Stake PoS

Transactions on Polygon are extremely cost-effective, making *NOLA* suitable for **d**aily use, microtransactions, and community-driven economies

Transaction Speed: Near-instant confirmation approx. 2 seconds

Scalability: Capable of handling thousands of transactions per second

By utilizing **Polygon** *NOLA* ensures **low costs and high-speed transfers**, making it practical for everyday use

The *NOLA* smart contract was developed with security in mind, ensuring **no central authority can modify, freeze, or increase the supply** once deployed

No Admin Control: No individual can freeze accounts or manipulate the system
Auditable on Polygonscan: The contract is publicly viewable for full transparency
Low Gas Fees: Users benefit from Polygon's efficient network

How the Community Can Get Involved

Anyone can contribute to the success of *NOLA* by

Spreading Awareness: Sharing information and helping *NOLA* grow

Providing Feedback: Suggesting improvements and ideas for development

Supporting Charity Initiatives: Engaging in donation and charity efforts

Roadmap

NOLA is committed to long-term growth, development, and community-driven success. Below is a structured roadmap outlining key milestones and future initiatives

Phase 1: Foundation & Launch

Token Deployment on Polygon
Whitepaper Release – Providing details about *NOLA*
Community Building – Establishing a presence on social media and forums
Website Development – Launching an official website with *NOLA*'s details

Phase 2: Growth , Adoption & Lunch

Exchange Listings – Apply for *NOLA* to be listed on decentralized exchanges (**DEXs**)
Marketing & Awareness – Organic promotion to attract users and supporters
Strategic Partnerships – Collaborating with projects that align with *NOLA*'s vision
Community Governance – Explore ways to let holders have a voice in decision-making

Phase 3: Real-World Utility & Expansion

Controlled Yearly Release = 10% per year
Ecosystem Development – Exploring potential real-world applications for *NOLA*
Major Exchange Listings – Expanding to centralized exchanges (**CEXs**)
Mass Adoption Efforts – Growing the community and expanding global use cases
